

WEEKLY FLU REPORT

Epidemiology Program—Influenza-Like Illness (ILI) Surveillance

2016 CDC Week 07

This report includes...

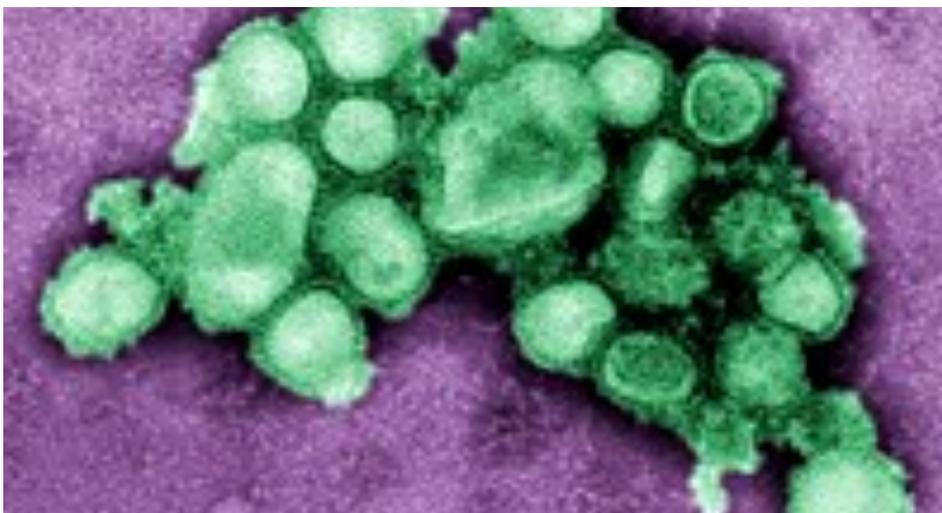

- ⇒ This report includes information on influenza-like illness (ILI) activity in Harris County as well as on the state and national level.
- ⇒ Absenteeism data are voluntarily reported from school nurses located at area public schools.

Important Notes:

- ⇒ Influenza-like illness (ILI) is defined as an illness including a fever (temperature of at least 100 °F) with a cough OR a sore throat, without another known cause (such as strep throat).
- ⇒ Influenza/ILI is reported on a voluntary basis and is not a mandatory notifiable condition.
- ⇒ Similarly, rapid influenza test results are also reported on a voluntary basis.
- ⇒ Therefore, data presented in this report indicate trends and should not be interpreted as a complete and total picture of influenza activity in Harris County.
- ⇒ The 2015-2016 influenza season is from October 4, 2015—May 21, 2016.

Public Health is “what we as a society do collectively to assure the conditions in which people can be healthy”

In This Issue

- National and State Influenza Activity
- Harris County School Absenteeism
- Texas Influenza Lab Testing Summary

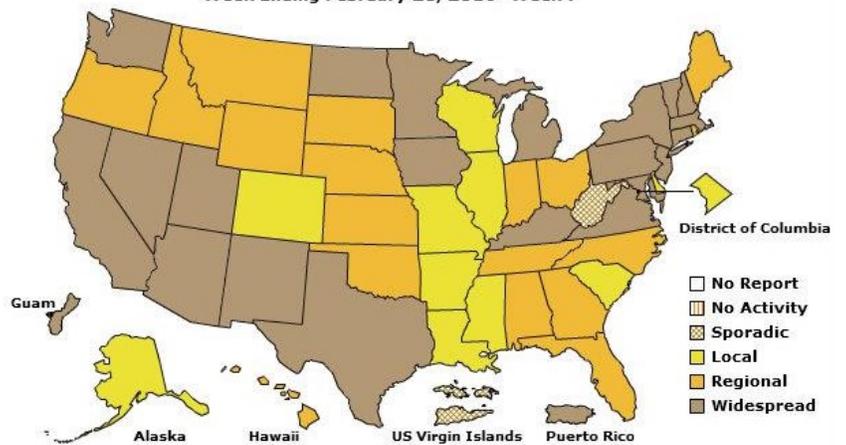

Influenza-Like Illness (ILI) Activity Level Indicator Determined by Data Reported to ILINet
2015-16 Influenza Season Week 7 ending Feb 20, 2016

Nationally

Influenza activity is considered to be widespread at high levels in the state of Texas for CDC Week 07 (February 14, 2016—February 20, 2016).

A Weekly Influenza Surveillance Report Prepared by the Influenza Division
Weekly Influenza Activity Estimates Reported by State and Territorial Epidemiologists*
Week Ending February 20, 2016- Week 7

Statewide

No variant influenza viruses have been identified in Texas during this flu season.

Locally

There have been no influenza-associated pediatric deaths reported in Harris County (excluding the City of Houston) during this flu season.

Statewide Influenza Activity Map
 Figure 4: Texas Map Displaying the Highest Level of Influenza or ILI Activity Reported by County for the Week Ending Feb. 20, 2016 (MMWR Week 7)

| County Influenza Activity Level | |
|---------------------------------|--|
| [Hatched pattern] | No information / no reporters |
| [White] | No activity |
| [Blue] | Influenza-like illness only (no laboratory confirmation) |
| [Cyan] | Rapid test positive flu |
| [Yellow] | Flu A (confirmed by culture or PCR) |
| [Green] | Flu B (confirmed by culture or PCR) |
| [Red] | Flu A and B (confirmed by culture or PCR) |

School Reporting

Influenza/ILI reporting is voluntary as it is not a mandatory notifiable condition. Therefore, this report indicates trends and should not be interpreted as a complete and total picture of influenza activity in Harris County.

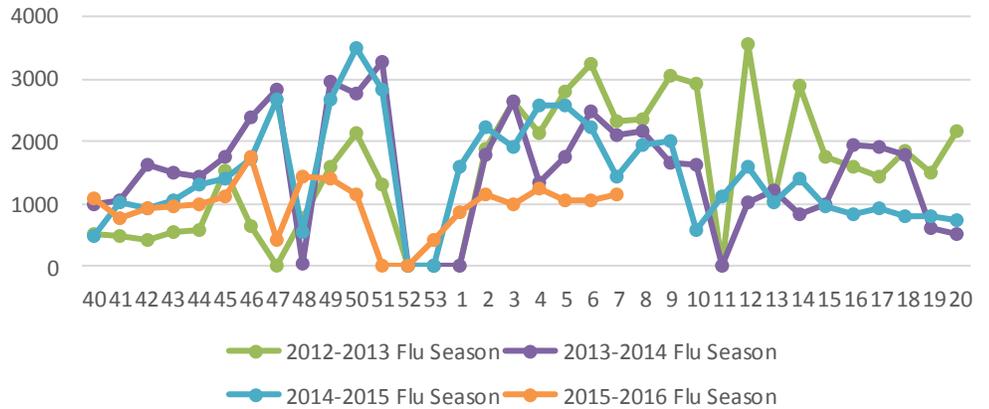

Daily absenteeism and student/staff ILI numbers are reported from schools in the 18 Harris County Independent School Districts (ISDs). Schools were asked to begin reporting ILI from the beginning of the school year; however, reporting participation generally increases as occurrence of ILI increases.

The 2012-2013, 2013-2014, and 2015-2016 influenza seasons did not have a week 53; the week 53 data point for those seasons is an average of weeks 52 and 1.

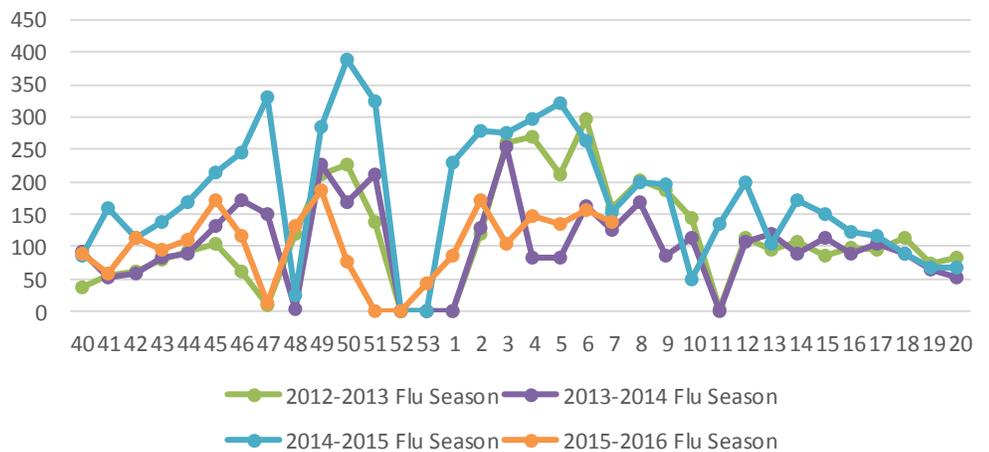

School holidays:

- * Week 47/48 (Thanksgiving)
- * Week 52-Week 1 (Winter Break)
- * Week 10/11 (Spring Break)
