FOOD SAFETY

Avoid illness after floods & storms

THROW AWAY any food that:

• Has been in a non-running refrigerator for 4 hours or more.
• Has an unusual odor, color, or texture.
• May have come in contact with flood or storm water.
• Has been at room temperature for more than 2 hours.
• Canned foods that are bulging, opened, or damaged.

Things to do:

• Wash hands often with soap and clean water or use an alcohol-based hand sanitizer.
• Thawed food that contains ice crystals or is 40° F or below can be refrozen or cooked. Refreezing these foods will be a quality (not safety) issue.

DO NOT:

• Use contaminated water to drink, make baby formula, wash and prepare food, wash your hands, brush your teeth, wash dishes, or make ice.
• Feed spoiled food to your pets as they can get sick, too.

Protect your family. Protect yourself. Avoid foodborne illness!
